

KIDS IN THE LAB

at the JBPHH branch

THU, AUG 13 3:30PM–5:00PM

Meet KIBO Robot!

Spark creativity and curiosity your child is introduced to the exciting world of coding! Through hands-on exploration, keiki will learn how to program the KIBO Robot using simple blocks, bringing their ideas to life through movement, music, and storytelling.

This engaging experience encourages problem-solving, teamwork, and imaginative play while building early STEAM skills in a fun and interactive way.

Come discover, create, and code with KIBO!

"Kids in the" series introduces and reinforces a love for reading and the fundamentals of a healthy lifestyle with our little ones. This program is hosted quarterly at each ASYMCA Branch for military children ages 3–10. 3–4 year olds must attend with parents. 5–10 year olds are welcome to attend independently. **See you there!**
